PROJECTS

Hotel Booking System

February 2022

Developed in React this is just an overview of management in hotels.
The project is aimed to maintain the day-to-day state of
admission/vacation of Residents, room details, etc.
This software application will help the admin to handle customer
information, room allocation details, Payment details, etc.

TRAVEL HILLS

October 2021

Travel Hills is a travel blog page that helps the user to find about
different locations in north India, from temples to places of attractions,
it covers everything. It can further be developed into a booking website
which can be used for booking cabs, hotels and tour guides on trips.
This is a react application with features including hooks, virtual dom,
etc.

META CRYPTO APP

January 2022

A React App that displays the stats of the top crypto currencies and
allows user to know more about all the top 100 cryptocurrencies. User
can read news and get information regarding cryptocurrencies based on
filters.

AIR BNB CLONE

A simple React clone App that displays and filters rooms. UI clone of
the official AIRBNB website, made with React, MaterialUI and other
React Libraries.
